

Note that I completed the final project in January/February already so the date of entry column is correct.

<b>Date of entry:</b>	<b>What I've worked on:</b>	<b>What problems I encountered:</b>	<b>What I learned:</b>	<b>Which resources did I use:</b>
30-01-2024	Bokeh Tutorials	It was a new library so everything was new so it took some time to read and learn everything.	Since I have never worked with this library it was all new. In terms of style I think that this library provides the most beautiful plots from all libraries I know thus far. This library is going to be extremely useful in my career I think because visualizing data is probably going to be a big part of my job.	Jupyter notebook, the internet for some help.
31-01-2024	Visualizing the data PART 1	This was the first time implementing what I learned in the Bokeh Tutorials so it was hard. I also had to use the Callback function that I never used which required some JavaScript knowledge which I barely know anything of either.	Applying the Bokeh library. The use of the callback function using JavaScript.	Bokeh tutorial, google and some sites to help me use the callback function using some JavaScript.
01-02-2024	Visualizing the data (finalizing) PART 1 and PART 2	I had to further increase my knowledge on the Callback function which required some JavaScript. This took longer than expected.	Further improved my Callback function skills using some JavaScript. Also further improved my Bokeh skills.	Bokeh tutorials, google and some sites to help me use the callback function using some JavaScript.

03-02-2024	Visualizing the data PART 3	Again continuing to further familiarize myself with the Bokeh library. I am slowly getting more comfortable using this library.	Further familiarize myself with the Bokeh library.	Bokeh tutorial, google and some sites to help me use the callback function using some JavaScript.
04-02-2024	Visualizing the data PART 4	I was searching for some real life events that could explain the results of my visualization but I had a really hard time finding what could of caused my results.	Today I tried to ask myself critical questions in order to decide what I want to visualize to help answer the research question.	Internet.
05-02-2024	Visualizing the data PART 5	The last time I had an econometric course was over 6 months ago so I had to refresh my knowledge.	That econometrics can be a great tool to quantify the visual results one could obtain.	Lecture slides from Econometrics 1 & 2 course.
